

AquaCell 1000 Bottled Water System

The AquaCell 1000 provides bottled water without the cost, inconvenience, liability and the security risk of old fashioned delivered water bottles.

The patented Aquacell Bottled Water System provides a virtually unlimited supply of freshly filtered water - without ever having to change the bottle. The permanently attached bottle automatically refills itself each time water is dispensed.

With the combined use of a UV disinfectant light, carbon and sediment filters, the Aquacell 1000 water cooler provides high quality, great tasting water!

Features:

- Self filling five-gallon bottle (up to 30 gallons/hr)
- Hot water: approximately 190°F
- Cold water: approximately 45°F
- Air filtration to ensure system is closed to outside contaminants
- Filters conveniently located behind front panel for easy changing

Options:

- Choice of hot & cold or room temp. & cold
- Adjustable cup-holder
- Traditional style dispensers
- Child-resistant hot water dispenser

Specifications:

- Refrigerant: R134A, 110V 60Hz-single phase-5amps
- Dimensions: H:55", W:13-3/8", D:15-1/2"
- 30" from floor to dispenser
- Complete Installation Kit Includes 30' 1/4" waterline
- UL approved, 1 Year Warranty

Filtration System:

- Sediment Filter
- 8-Stage Multi-media Filter:
 1. Stainless steel disbursement screen
 2. First bed of EPA registered silver impregnated carbon
 3. KDF
 4. Activated 20x50 mesh carbon
 5. Activated 12x40 mesh carbon
 6. Second bed of EPA registered silver impregnated carbon
 7. Sediment filter
 8. Stainless steel filter screen

• Ultraviolet Disinfection Chamber (UV)

The installed UV filter is bacteriostatic to inhibit bacterial growth and has been tested and registered with the U.S. Environmental Protection Agency (EPA). With the combined use of UV disinfectant light, carbon and sediment filters, the Aquacell 1000 water cooler provides high quality, great tasting water.

Emerging Technology Corporation – Green Division (ETC Green) will support and maintain the AquaCell 1000 for 1 year after installation at no charge. Thereafter, ETC Green offers maintenance contracts for the units at \$145.00 annually. This service includes water filter replacement & complete professional cooler sanitization. Hydrogen peroxide in steaming water is used to clean & sanitize water coolers and equipment. All water lines and every part that comes in contact with the water is thoroughly sanitized. Our sanitization methods meet hospital standards.
